

IVAN ZHUK

Project manager,

Engineering manager / consultant

WORK EXPERIENCE

BALANSTAR

September 2025 – Present

Chief engineer

- determine technical policy and development direction, and develop the structure of design and operational documentation for the company's main products
- organize the work of remote employees to implement technical tasks
- negotiate with customers, contractors, and counterparties to agree on any technical and production issues
- coordinate issues of standardization, certification and protection of intellectual property

February 2025 – August 2025

Project manager

- managed the workload and interaction within the team, conducted general calls, retrospectives, and compiled technical assignments
- interacted with the customer, analyzed the initial documentation, and agreed on changes
- initially configured Jira, all business processes, automated the process of calculating development time

November 2022 – October 2024

Engineering consultant / Project manager

- analyzed the initial information in engineering projects, advised the development team on the technical features of the required virtual simulators
- planned the process of developing interactive simulators, participated in the formation of documentation, drew up development tasks, monitored their implementation, using Jira and Confluence for this purpose

DETAILS

Date of birth : 07.14.1988

Gender : male

Civil status : married

ABOUT ME

I am a specialist with extensive experience in engineering, passionate about the capabilities of information technology.

The technical mindset allows me to study and solve the tasks of different levels of complexity both in the technical and managerial areas, as well as in team interaction.

IVAN ZHUK

Project manager,

Engineering manager /
consultant

HARD SKILLS

Russian

English

Project management and
automation systems

Planning

Structuring information

Technical documentation & CAD-
systems

SOFT SKILLS

- I know well from experience what teamwork is, the value of the strengths of each team member and the importance of motivation
- able to learn and adapt to change
- I have strong analytical and critical thinking skills
- I have a great zest for life and believe that every predicament can be resolved

HOBBIES

ERINTEK Siberia

April 2015 – January 2021

Head of the group of measurement and restoration works and certification of hazardous industrial facilities

- organized works on inspection, laser scanning and photopanning of industrial facilities (Achinsk oil refining plant, Angarsk petrochemical plant, Zarubezhneft, etc.)
- organized work for a team of 5 people on creating electronic information passports for large industrial enterprises
- created solid-state 3D models and design documentation of technological elements and equipment, using documentation from different countries

NEOLANT Infoling

December 2012 – March 2015

Chief specialist of the Engineering Department

- created information solid-state 3D models of any complexity for virtual simulators of such enterprises as the Kolskaya nuclear power plant, Novovoronezhskaya 2 nuclear power plant, etc.
- studied and implemented design PDM / PLM systems, through which the speed and convenience of the design work of engineers significantly (50-60%) increased

OKB Zenith

September 2010 – November 2012

Design engineer

- created design documentation for non-standard equipment, interacting directly with the departments of technologists and production
- participated in research activities, as a result of which I have a patent for a utility model

EDUCATION

February 2021 – October 2022
2017

Unreal Engine game developer course
web development course

- studied stack: Unreal Engine, C++, Blueprints, Git...
- studied stack: HTML 5, CSS 3, SASS, JavaScript, SVG, Figma...

September 2011 – June 2014

Siberian State Aerospace University

- Faculty of technology and economy
- Department of logistics
- Master's degree in logistics, Diploma with honours

September 2005 – June 2011

Siberian State Aerospace University

- Faculty of mechanical engineering and mechatronics
- Department of refrigeration, cryogenic engineering and air conditioning
- Engineering degree, Diploma with honours
